When the boat was hauled out of the water and washed down it was quite apparent that there was quite a lot of surface rust on the keels and as such it would be a good idea to clean them up and seal them against further corrosion before putting the boat back in the water.

The following two photos show the keels before they were cleaned up and resealed.

We chipped all the old paint and surface rust off before letting Tommy our boat builder take over the job. He then used an air scabbel gun to finish the clean up job before first treating
